

Steps for Internet Explorer:

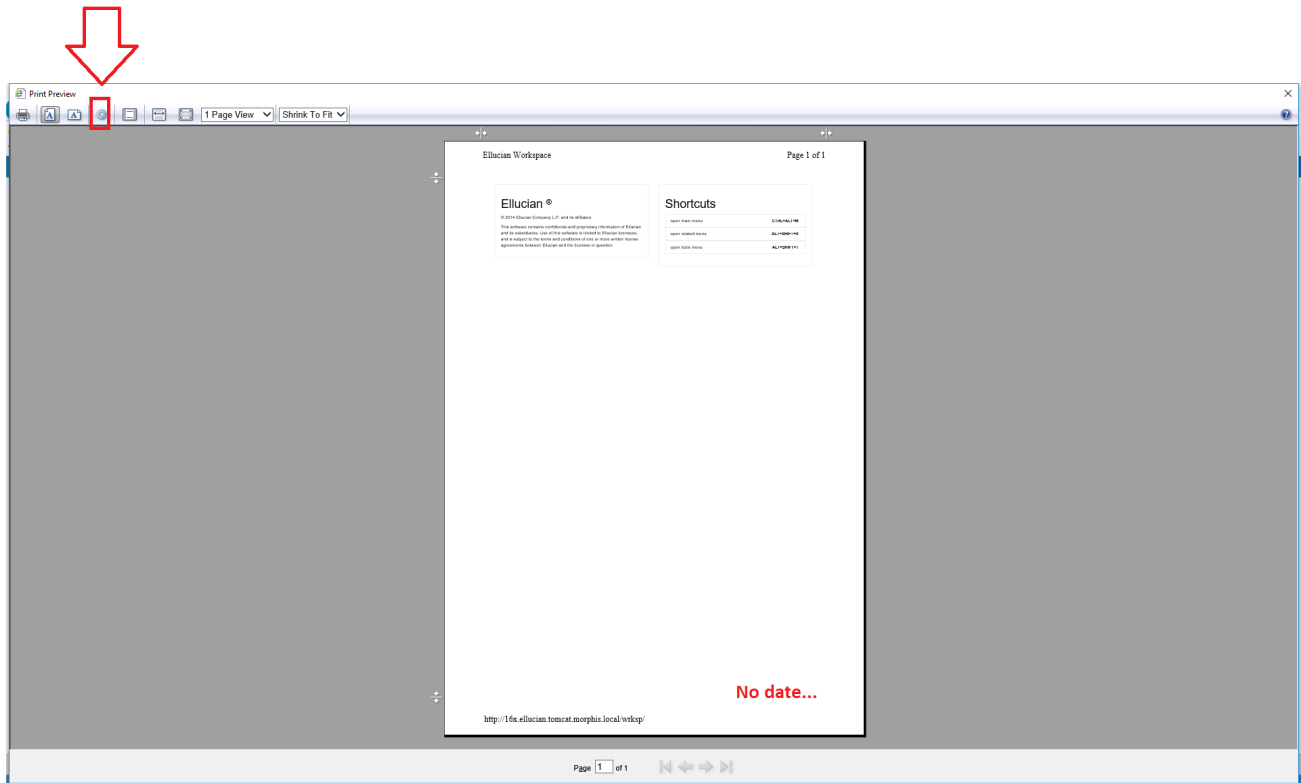

1) open settings

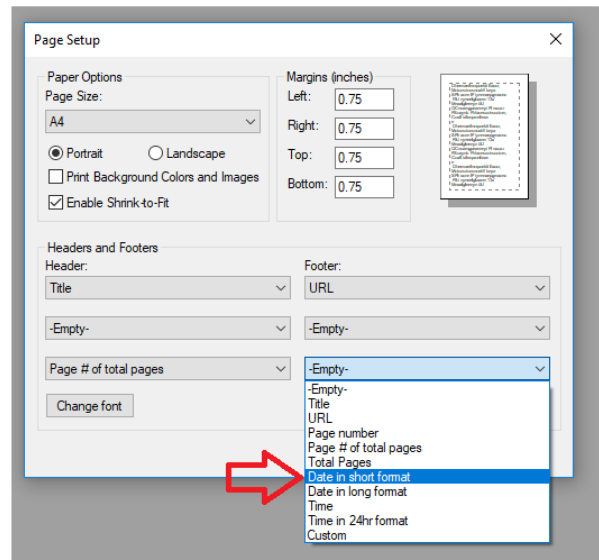

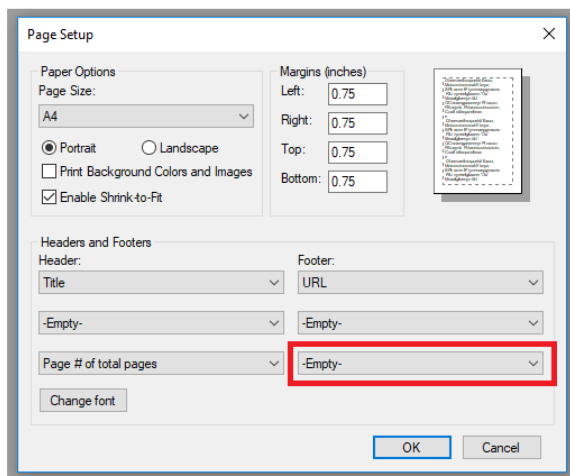

2) Open Print preview

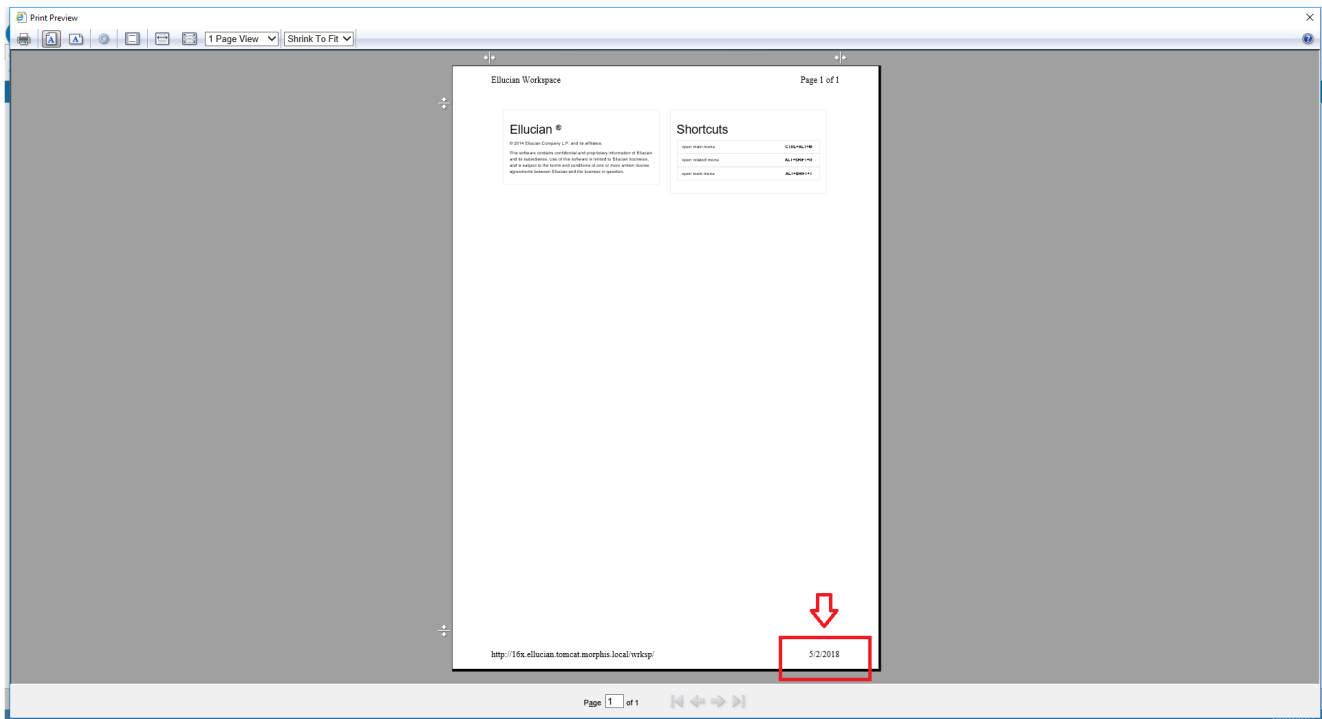

3) As you can see on the image bellow, the print preview page does not show the date. Open the page setup menu as shown on the image.

4) On the page setup menu, on the Footer section, select the desired date format.

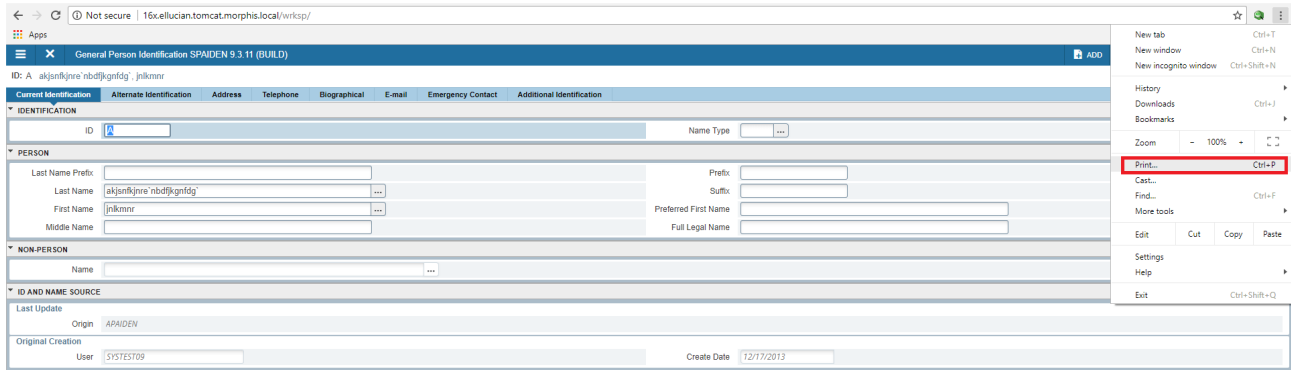

5) The date is now showing correctly on the footer of the print preview page

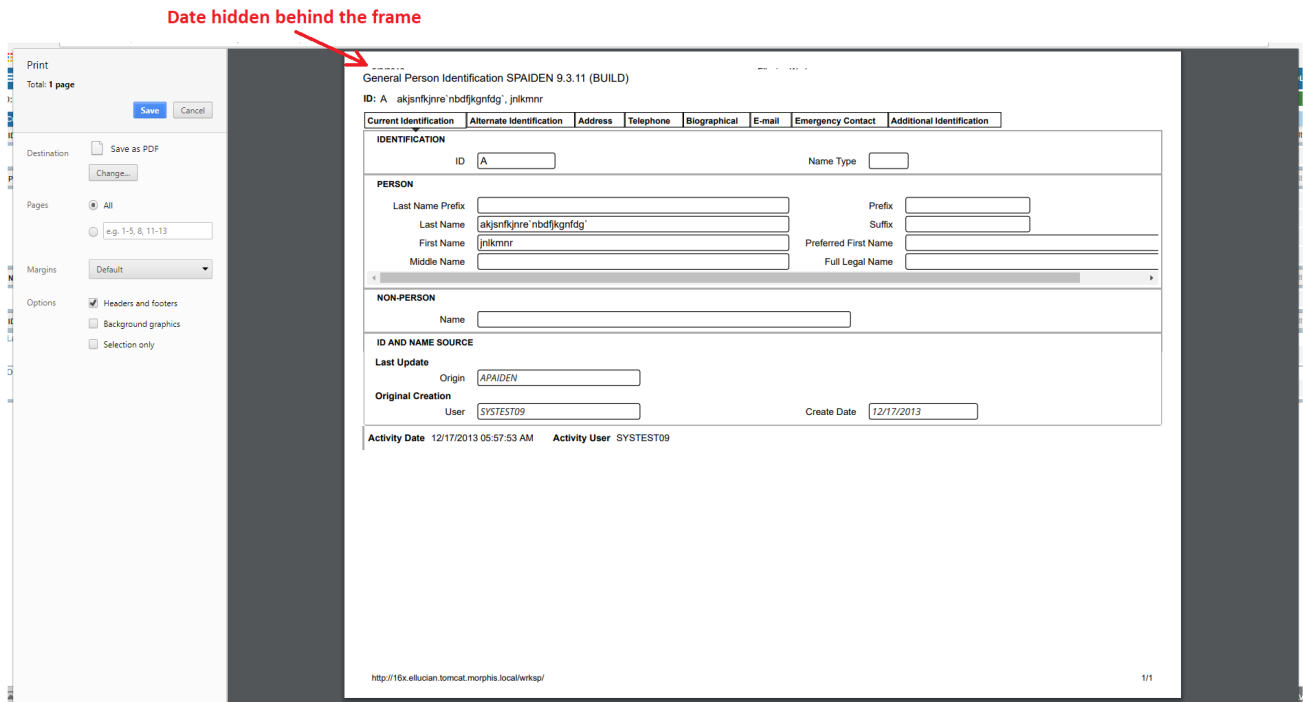

Steps for Google Chrome:

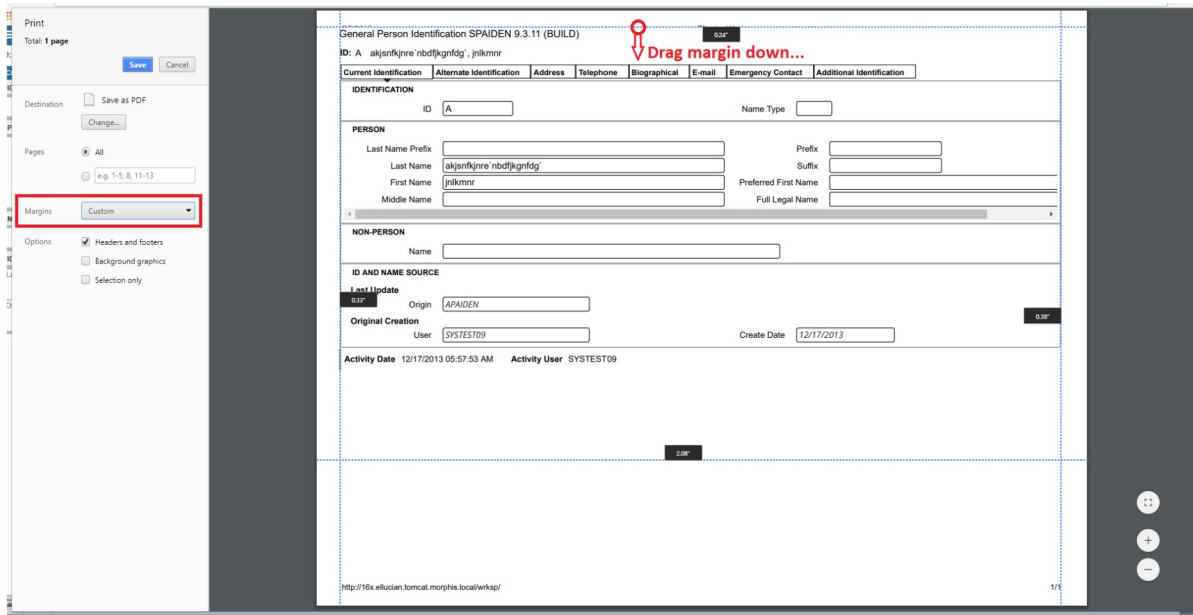

1) Open print menu of the browser

2) Notice that the date is hidden behind the frame.

3) Change the margins mode to “Custom” and drag down the upper margin.

4) The date should now be visible on the top of the page.
