

IT-SERVICE Phishing - 5/5/2018

This interesting message, supposedly from ITS Help-Desk, informs users they are migrating their accounts to a new Outlook system. This is in fact false. The need to also "verify and Log in" is also false, as this would not need to be done if it were true. The sender of the message is from Germany, denoted from the "@gsi.de" address. Always confirm with your IT representative and IT staff about such messages!

Subject: RE: IT-SERVICE

Dear Staff/Employees,

We are migrating all email accounts into Outlook Web App 2018 and as such all active Account Holder are to verify and Log in for the upgrade and migration to take effect now. This is done to improve the security and efficiency due to recent spam mails received.

Click [Upgrade Account](#) to migrate and block further Spam mails.
