

# How to Connect to EagleNet (WiFi)

[Expand all](#) [Collapse all](#)

## Overview

This is a guide for faculty, staff, and students to use when accessing the campus WiFi, affectionately dubbed "EagleNet".

*\*Guest access can be obtained by connecting to TTU-Guest and registering.*

## Through TechExpress Viewing Your EagleNet Access Key in TechExpress

1. Go to <https://express.tntech.edu>. **Log in** with your Tennessee Tech username and password.

 Don't know your Tennessee Tech username and password? Try this page first: [Setting Up Your TTU Account](#).

 You'll want to bookmark TechExpress, as you'll use it for most everything while you're at Tennessee Tech.

2. In your **Information** area (on the left), there's a section labeled "**EagleNet WiFi Key**". To see your EagleNet key, click **Show Existing Key**.

### EagleNet WiFi Key

**Show Existing Key**

Reset Key

 Your access key is valid for the life of your account.

However, should you need to reset it for some reason, simply click the **Reset Key** button. If you need help in resetting EagleNet on your device (also called "forgetting a network"), check out the article [How to Forget a WiFi Network](#).

## How to Connect to EagleNet

1. On your device, **connect to** the WiFi network called "**EagleNet**".
2. You will be prompted to enter a security key. This is where you enter the key you obtained from TechExpress (in the steps outlined above). **Enter your key**.
3. Choose **Connect**.
