## How to Connect to EagleNet

### [How to Connect to EagleNet \(WiFi\)](#)

This is a guide for faculty, staff, and students to use when accessing the campus WiFi, affectionately dubbed "EagleNet".

## How to Forget a WiFi Network

### [How to Forget a WiFi Network](#)

Forgetting a wireless network on your device is often a useful strategy when troubleshooting wireless network problems, particularly if your configuration or access key for the wireless network may be incorrect. This article provides instructions on how to forget a wireless network on various operating systems and device types.

## NAT Type Restrictions

### [NAT Type Restrictions on the Tennessee Tech Network](#)

Our campus network, as is most other educational, corporate, or public networks, is a **Strict NAT (type 3)**. This may cause problems with certain online games, dependent upon how the game developers have designed online play to function. Check here for an in-depth explanation.

## Register with Extreme NAC

### [Wired Device Registration with Extreme NAC](#)

You have a desktop, gaming console, or other device in your dorm room or apartment that you would like to connect to the TTU wired network.

## Wireless Access for Guests

### [Wireless Access for Guests](#)

Visitors on campus can use this article to get access to the internet via the TTU wireless network.
